

REAL-TIME DATA, WHEREVER YOU ARE

- MS Excel add-in for data management
- It supports the most common communication protocols
- Web platform
- Drag & Drop technology
- Multiplatform
- Scalable solution

Data collection

SUCCESS CASE: COMBINED CYCLE

Alpiq has an extensive and diverse services portfolio, highly flexible and eco-friendly:

- Extensive: approximately 6,300 MW installed/ approximately 17,800 GWh (2015)
- Diverse: This portfolio covers hydroelectric power, thermal plants and some new European markets such as renewable energies in Switzerland.
- Highly flexible: focused on storage combined cycle and pumped-gas plants.
- Environment: 70% of the generation is CO2-free

PlantValue data collection and implementation allows for the monitoring and compliance of data derived from your emissions and power data. Reading communication with GE.

DATA MANAGEMENT WITH STANDARD TOOLS

- Data management is carried out using the MS Excel® ProData and ProManager add-ins.
- Current data visualisation, history and critical data, alarms, KPI, number of maximum exceedances, performance time... and many other functions.

Power generation by country
